

# Riya Jain

New York, NY | +1 (551) 229-8681 | [rj2628@nyu.edu](mailto:rj2628@nyu.edu) | [LinkedIn](#) | [Github](#)

## Education

### New York University, Courant Institute of Mathematical Sciences

Expected Graduation: May 2025

Masters of Science in Information Systems. GPA: 3.7/4.0

New York, NY

Relevant Coursework: Fundamentals of Algorithms, Database Systems, Devops and Agile, Data Science for Business.

### Maulana Azad National Institute of Technology (NIT Bhopal)

July 2016 - June 2020

Bachelors of Technology in Computer Science and Engineering.

Bhopal, India

## Technical Skills

**Languages & Frameworks:** Java, Python, Go, JavaScript/TypeScript, Node.js, React.js, REST APIs, GraphQL, Microservices

**Tools & Infrastructure:** AWS Cloud, CI/CD (GitHub Actions), Git/GitHub, Unit/Integration Testing, Agile/Scrum, Docker/Kubernetes.

**Certifications:** AWS Cloud Practitioner, Scrum Team Member, Advanced Data Structures and Algorithms

## Work Experience

### Rally Sports Venture

New Jersey, U.S

#### Software Developer Intern

June 2024 - August 2024

- Built a **React application with 10+** reusable components (payment forms, dashboards, content galleries) and **2000+** lines of Typescript code, facilitating membership purchases and exclusive content access; the tool is now utilized by over **500+ users**.
- Developed a **secure payment** processing system using **Stripe & OAuth 2.0**, ensuring encrypted transactions and **100% PCI** compliance, safeguarding **500+ user transactions**.
- Wrote comprehensive unit and integration tests achieving **95% code coverage**, reducing post-deployment bugs by **70%** and decreasing QA testing cycles by 8 hours per sprint, while maintaining strict code quality standards

### John Deere

Pune, India

#### Senior Software Engineer

September 2021 - May 2023

- Developed a microservices-based Attachment Recommender Tool using Java Spring Boot and AWS, enabling real-time inventory sync, increasing attachment sales by **15% in one quarter**.
- Implemented end-to-end **CI/CD** pipeline using **GitHub Actions** for frontend and backend applications, reducing deployment time by **30%** and increasing release frequency from **bi-weekly to weekly**.
- Designed **AWS CloudFormation** infrastructure with Python Lambda functions and **REST APIs** connecting to DynamoDB, enabling automated product promotions on **deere.com** and serving **30,000+ daily** U.S. customer requests.
- Built an interactive dealer locator page using **Leaflet.js** and **Google Maps API** for map rendering, integrating PostgreSQL (PostGIS) and **Elasticsearch** for geolocation-based dealer search, increasing dealer visit rates by **25%**.

#### Software Engineer

August 2020 - August 2021

- Reduced high risk vulnerabilities on **EC2 web servers** by **90%** by automating the redundant AMI Upgrade process and cutting monthly maintenance time by **10 hours** in one quarter.
- Engineered **Groovy-based Jenkins pipelines** with automated testing, security scanning, and deployment processes, reducing deployment time by **50%**.
- Optimized **product search performance on deere.com** by implementing Redis caching and PostgreSQL query tuning, **reducing** query response times by **40%**.
- Designed Selenium WebDriver testing framework for John Deere product pages with cross-browser compatibility and content validation through **30+ custom scripts**.

## Projects

### StreamSphere Streaming platform | Javascript, Apache Kafka, AWS, Node.js | [Github](#)

January 2025 - Present

- Developed full-stack video streaming platform with Node.js/Express backend and React frontend, integrating AWS S3 uploads, HLS adaptive streaming, and Apache Kafka for real-time data processing.

### Stock Trading Platform | Next.js, Express.js, GraphQL, Upstox Websocket API - [Github](#)

January 2025 - Present

- Developed a full-stack trading platform with Next.js/Express.js that streams real-time data from 84,000+ financial instruments via Upstox WebSocket API, featuring personalized watchlists and search using OpenSearch and GraphQL.

### Ecommerce Microservice | Python, JavaScript, Docker, Kubernetes | [Github](#)

September 2024 - December 2024

- Built a RESTful eCommerce customers microservice using Python and Flask-RESTX, implementing CRUD operations, resource querying, and action execution while ensuring **97% unit test coverage with TDD and BDD testing frameworks**.
- Automated six-stage CI/CD pipeline with GitHub Actions & Tekton on OpenShift for Kubernetes deployment.
