Education

New York University

September 2023 - May 2025

Master of Science in Information Systems. GPA - 3.7/4.0

New York, NY

Courses: Fundamentals of Algorithms, Database Management Systems, Data science for Business.

Maulana Azad National Institute of Technology(NIT), Bhopal

July 2016 - June 2020

Bachelor of Technology in Computer Science and Engineering.

Bhopal, India

Courses: Object Oriented Programming, Operating Systems, Data Structure and Algorithms, Database Systems, NLP.

Technical Skills

Programming & APIs: Java, Python, JavaScript, TypeScript, C++, Shell Script, REST APIs, GraphQL, WebSockets, Upstox API

Web Tech & Frameworks: HTML, CSS, React.js, Next.js, Angular, Vue.js, Node.js, Express.js

Databases & Query Languages: MySQL, PostgreSQL, DynamoDB, Amazon RDS, Redis, PL/SQL

DevOps & Cloud Technologies: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Drone CI, Terraform.

Testing & Quality Tools: Selenium, JUnit, PyUnit, Pylint, SonarQube, Veracode, Figma

Work Experience

Software Developer Intern, Pickleball Minds (Startup)

June 2024 - August 2024, New Jersey, U.S

- Built a **React application with 10+** reusable components (payment forms, dashboards, content galleries) and **2000+** lines of Typescript code, facilitating membership purchases and exclusive content access; the tool is now utilized by over **500+ users**.
- Developed a **secure payment** processing system using **Stripe & OAuth 2.0**, ensuring encrypted transactions and **100% PCI** compliance, safeguarding **500+ user transactions**.
- Developed comprehensive unit and integration tests achieving **95% code coverage**, leading to improved customer satisfaction.

Senior Software Engineer, John Deere

September 2021 - May 2023, Pune, India

- Developed a microservices-based Attachment Recommender Tool using Java Spring Boot and AWS, enabling real-time inventory sync, increasing attachment sales by **15% in one quarter**.
- Implemented end-to-end **CI/CD** pipeline using **GitHub Actions** for frontend and backend applications, reducing deployment time by **30%** and increasing release frequency from **bi-weekly to weekly**.
- Designed **AWS CloudFormation** infrastructure with Python Lambda functions and **REST APIs** connecting to DynamoDB, enabling automated product promotions on **deere.com** and serving **30,000+ daily** U.S. customer requests.
- Built an interactive dealer locator page using **Leaflet.js** and **Google Maps API** for map rendering, integrating PostgreSQL (PostGIS) and **Elasticsearch** for geolocation-based dealer search, increasing dealer visit rates by **25%**.

Software Engineer, John Deere

August 2020 - August 2021, Pune, India

- Reduced high risk vulnerabilities on **EC2 web servers** by **90%** by automating the redundant AMI Upgrade process and cutting monthly maintenance time by **10 hours** in one quarter.
- Engineered **Groovy-based Jenkins pipelines** with automated testing, security scanning, and deployment processes, reducing deployment time by **50%**.
- Optimized **product search performance on deere.com** by implementing Redis caching and PostgreSQL query tuning, **reducing** query response times by **40%**.
- Designed Selenium WebDriver testing framework for John Deere product pages with cross-browser compatibility and content validation through **30+ custom scripts**.

Projects

StreamSphere Streaming platform | Javascript, Apache Kafka, AWS, Node.js | [Github](#)

January 2025 - Present

- Developed full-stack video streaming platform with Node.js/Express backend and React frontend, integrating AWS S3 uploads, HLS adaptive streaming, and Apache Kafka for real-time data processing.

Stock Trading Platform | Next.js, Express.js, GraphQL, Upstox Websocket API - [Github](#)

January 2025 - Present

- Developed a full-stack trading platform with Next.js/Express.js that streams real-time data from 84,000+ financial instruments via Upstox WebSocket API, featuring personalized watchlists and search using OpenSearch and GraphQL.

Ecommerce Microservice | Python, JavaScript, Docker, Kubernetes | [Github](#)

September 2024 - December 2024

- Built a RESTful eCommerce customers microservice using Python and Flask-RESTX, implementing CRUD operations, resource querying, and action execution while ensuring **97% unit test coverage with TDD and BDD testing frameworks**.
- Automated six-stage CI/CD pipeline with GitHub Actions & Tekton on OpenShift for Kubernetes deployment.
